PROFILE SUMMARY

Data Science undergraduate specializing in AI/ML, NLP and data-driven applications, with strong foundations in Python, SQL, Machine Learning, Data Analysis, and Web Development. Passionate about building intelligent systems and solving real-world problems through AI and analytics. Experienced in developing end-to-end projects using Python, React, Django, and PostgreSQL. Quick learner with strong problem-solving skills, eager to contribute to innovative teams while continuously enhancing technical expertise.

KEY EXPERTISE

Python, SQL, OOP, Git, Machine Learning, Deep Learning (TensorFlow, PyTorch), Generative AI, LLMs, RAG, NLP, Word Embeddings, Computer Vision, OCR (Tesseract), Pandas, NumPy, Scikit-Learn, Feature Engineering, SHAP, Data Analysis, Data Visualization (Power BI, Tableau), Unstructured Data Processing, Hadoop, MapReduce, FastAPI, Django, REST APIs, React.js, Streamlit, PostgreSQL, SQLite, ChromaDB

EDUCATION

RNS Institute of Technology — B.E., CSE (Data Science) *2023 – 2027*
CGPA: 8.63 / 10

Carmel PU College, Bengaluru — 12th (PUE Karnataka) *2023*
Percentage: 84.90 / 100

Max Muller Public School, Bengaluru — 10th (KSEEB) *2021*
Percentage: 89.90 / 100

PROJECTS

IntelliFix — AI Powered Civic Complaint Management System *Team of 4 | Jun 2026 – Sep 2026*
Key Skills: React.js, Django, REST API, JWT Authentication, SQLite, NLP, CLIP, Computer Vision, Scikit-Learn

- Built a full-stack civic complaint platform with role-based access control for Citizens, Administrators, Department Officials, and Technicians.
- Implemented NLP-based complaint classification using TF-IDF and Logistic Regression for automated department routing.
- Integrated CLIP, OCR, EXIF GPS metadata and Leaflet mapping for image validation and location verification.
- Designed an end-to-end complaint lifecycle with priority scoring, technician assignment, progress tracking and resolution-time prediction.

FinInsight — RAG-Based Financial Document Intelligence Platform (Self-led) *Solo | Jun 2026 – Jul 2026*
Key Skills: Python, FastAPI, React.js, NLP, PyMuPDF, LLMs, RAG, Tailwind CSS, SQLite, ChromaDB

- Developed an AI-powered platform to analyze corporate annual reports using Retrieval-Augmented Generation (RAG), semantic search and LLMs.
- Implemented document processing with PDF ingestion, semantic chunking, vector indexing and citation-backed conversational retrieval.
- Automated KPI extraction, financial ratio computation, executive summarization and cross-company comparison through interactive visualizations.
- Built a full-stack application using React.js, FastAPI, ChromaDB and SQLite for document intelligence.

Project Link: https://github.com/joee-codes/FinInsight

ChurnLens — Customer Churn Prediction & Retention Analytics Platform *Team of 2 | Mar 2026 – May 2026*
Key Skills: Python, Pandas, NumPy, Scikit-Learn, Feature Engineering, SHAP, EDA, Data Visualization, Streamlit

- Built and deployed a customer churn prediction system using Random Forest on the IBM Telco Customer Churn dataset.
- Designed a 9-page Streamlit application with single and bulk prediction, analytics dashboard and SHAP-based explainability.
- Integrated SQLite-backed prediction history and a conversational AI assistant using Groq API and Llama 3.1 for churn insights.
- Developed interactive visualizations including ROC curves, feature importance and SHAP waterfall charts.

Project Link: https://github.com/joee-codes/churn-predictor-pro

CERTIFICATIONS

- **Introduction to Structured Query Language (SQL)** — Coursera. Covered relational database fundamentals, data retrieval, filtering, sorting, joins, aggregate functions, subqueries, and database management.

SEMINARS / TRAININGS / WORKSHOPS

Building Predictive Model for Brain Tumour Detection — Peer-to-Peer Learning Session *27 Mar 2026*
RNS Institute of Technology, Dept. of CSE (Data Science). Presented the predictive modeling workflow — data preprocessing, model development, and prediction methodology — to 6th-semester students as student speaker.
